Imagine watching your favorite TV shows with the same razor sharp clarity and a high definition picture as a DVD movie, with no subscription fees or service charges! Imagine watching your favorite sports game with an image so detailed you can see the blades of grass on the field! LifeView's digital TV solutions bring free-to-view digital television to your desktop or laptop PC!

Take your viewing experience to the next level with our Duo and Trio cards! Our Duo cards give you both digital and analog TV reception, and our Trio model gives you digital satellite, digital terrestrial and analog TV reception, all in the same card! Using LifeView's exclusive MST technology, you can now watch digital TV and analog TV/video simultaneously with true PIP functionality!

Record digital TV perfectly to MPEG-2, or take control with PVR TimeShifting functions and pause, rewind and fast forward live TV! Teletext and EPG are supported, and scheduled recording has never been easier with one-touch recording from EPG! With S-Video and composite video inputs, customizable channel lists, channel autoscans and much more, LifeView's line of digital TV products transforms your PC into the home entertainment system you've dreamed of!
