

設計優良產品  
GOOD DESIGN PRODUCT

Taipei , October, 2003 --- Animation Technologies Inc., the provider of innovative designs and solutions in multimedia and IA products, today announced the our latest products : TV Walker , Dream Player and Fly CAM-SD have been approved by the **Good Design Product Selection Committee** as a **Good Design Product**, recently under Lifeview brand.

This committee formed by the industry field, government and academic professionals to carefully review and evaluate all entries, nationwide. It's a honor to share this great recognition with all our customers! The Good Design Products are :

**TV Walker** is a mini external TV tuner box compliant with USB2.0/1.1. It is the first all-in-one TV tuner box supported the worldwide TV system and TV stereo sound. With TV Walker, you can view, pause and capture live video from TV or any video source, such as DVD, VCD on your Notebook or desktop PC. Moreover our TV Walker is equipped with the real-time MPEG codec chipset and enables you to record video as MPEG1, MPEG2, MPEG4 formats.

**Dream Player** is a simple, friendly, high-quality and easy-to-use home media stand-alone device, which brings you the fun of audio & video. It provides A/V outputs to show digital photos, DVD video and MPS music via TV set without using any PC computer. It is also designed to support six kinds of storage cards including SM, SD/MMC, MS, CF, IBM Microdrive. Dream Player is definitely a perfect multimedia player for home entertainment.

**FlyCAM-SD** is a PDA camera compliant with SDIO Interface. It's the first SD-camera solution in the world with Flash Light and 1.3 Mega pixels. With the FlyCAM-SD you have the ability to take snapshots and record video. It turns your PDA not only to a digital camera , but also to a Digital Camcorder.
