

Company: Animation Technologies Inc.

Product Category: Graphics Card

Product Name: Fly TV Platinum video capture card

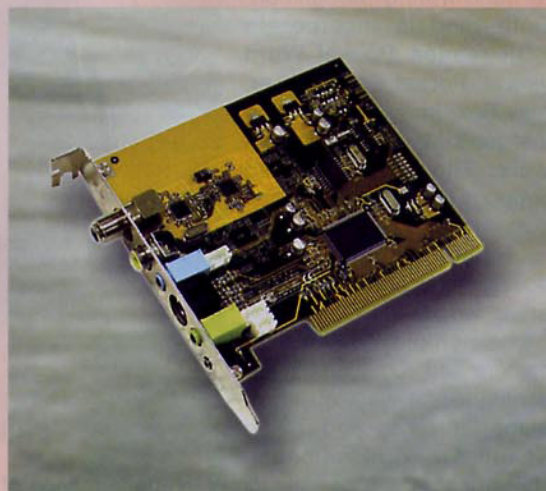

Animation Technologies Inc., under its Lifeview brand, gives the Fly TV Platinum, a next-generation TV video capture card. The Fly TV Platinum incorporates the Philips Silicon Tuner solution and supports all worldwide TV systems all in one card, giving consumers a one-stop shop solution for a TV tuner product.

Lifeview's next generation Global TV video capture card brings a whole TV world to the consumer's home. With the unique advantages of the Philips Silicon tuner, the Fly TV Platinum not only covers the TV standards worldwide but also provides for customers the best quality and performance, enabling the users to watch TV on the PC without any restriction.

A great feature of the Fly TV Platinum TV video capture card is that it captures content from any video standard. It covers NTSC, PAL BG, PAL DK, PAL I and SECAM LL', as an all in one capture card. This feature allows users anywhere in the world to use the Fly TV Platinum.

The company also provides a worldwide TV system solution in a mini PCI interface as the Fly TV Platinum mini, a leading innovation for notebook manufacturers. The system offers a good solution for frequent travelers who would like to enjoy the convenience of recording their favorite TV programs from a notebook and play it later.

The Fly TV Platinum comes bundled with different software applications, including LifeView Studio, LifeView Editor, and LifeView Encoder. LifeView Studio enables users to watch live TV/ Video, to record of full-motion videos, and to take snapshots of still images. It allows video to be recorded as VCD format, MPEG, or AVI files on the computer. LifeView Editor adds powerful digital video editing capability to the PC. LifeView Encoder allows users to convert AVI files into MPEG I/ II.

At a Glance....

Animation Technologies Inc., founded in October 1990, has been developing award-winning Multimedia and Video products for more than 10 years. The experienced R&D team enjoys an aggressive and innovative spirit that drives it to the forefront in developing multimedia solutions for corporate, consumer and OEM markets. This dedication to quality is reflected in the ISO 9001 certification earned in 2001. Animation Technologies markets and distributes its high-quality products under the "LifeView" brand worldwide.

Encouraged by rapid sales growth in the European and U.S. market, Animation established two subsidiary companies; LifeView Inc. with headquarters in Fremont, California and LifeView in Europe to better serve its customers on a more local level. In 2002, an office was opened in Japan to provide further support for OEM customers as well as to strengthen relations with strategic partners in that region.
