

# FlyTV Platinum Gold

## PCI TV / VIDEO CAPTURE CARD

LifeView's FlyTV Platinum Gold blends cutting edge technology and high-end features to bring you a complete digital entertainment solution for your Slim PC!

The FlyTV Platinum Gold is a low profile PCI card that provides PC-TV and video capture functionality. Built with a Philips silicon tuner, it has support for worldwide TV standards such as NTSC, PAL, and SECAM. It also has support for worldwide stereo sound standards including NiCAM, A2, MTS, BTSC, and EIAJ. This makes it possible for users anywhere in the world to enjoy high resolution TV with stereo sound using the FlyTV Platinum Gold.

The FlyTV Platinum Gold also has an onboard connector for use with our optional A/V input box. There's no need to reach around your computer to plug in external video devices — simply install the A/V input box and you can plug your VCR, camcorder, game console, or other S-Video or composite video device into the front of your computer! The A/V input box also has a built-in IR sensor for use with the FlyTV Platinum Gold remote control! Turn your Slim PC into a digital home theater with the FlyTV Platinum Gold!
